RT Sibmitted (AUG-2001) to the EMBL/GenBank/DDBJ databases.

RI Submitted (AUG-2001) to the EMBL/GenBank/DDBJ databases.

CC disrupting noncovalent bonding between cellulose microfibrils and cc disrupting noncovalent bonding between cellulose microfibrils and cc matrix glucans. No enzymatic activity has been found. Plays a cc major role in control of leaf growth and influences the mechanical cc preakage behavior of the pedicel.

CC -1 TISSUE SPECIFICITY: Most highly expressed in the young leaf petiole and midrib, in trichomes and at the base of the pedicel.

CC -1 DEVELOPMENTAL STAGE: Expression is first seen at the base of the cc emerging first two true leaves but not of the cyclyledons. As leaf development progresses expression begins in the base of the petiole and gradually extends toward the whole midrib and later it complete and gradually extends toward the whole midrib and later it clist is restricted to the vasculature of the petiole and leaf blade and clistoppears as the leaf matures.

CC -1 SIMILARITY: Contains 1 expansin-like CBD domain.

Res. 7:131-135(2000).

FUNCTION: Causes loosening and extension of plant cell walls be disrupting noncovalent bonding between cellulose microfibrils matrix glucans. No enzymatic activity has been found (By similarity).

SUBCELLULAR LOCATION: Cell-wall bound.

SIMILARITY: BELONGS TO THE EXPANSIN FAMILY.

SIMILARITY: Contains 1 expansin-like EG45 domain.

SIMILARITY: Contains 1 expansin-like CBD domain.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               ARATH
